PROFESSIONAL SUMMARY

Front-End Developer with strong experience in React, TypeScript, Redux, APIs, and SEO. Skilled in building responsive, accessible, and highperformance web applications. Currently training in Quantum Computing fundamentals to expand technical capabilities and stay aligned with emerging technology. Seeking a frontend or fullstack role in the UK to grow within an innovative engineering environment.

TRAINING

Quantum – Front-End Developer Trainee (2025 – Present)

Receiving hands-on training in React, TypeScript, UI development, API integration, and GitHub workflows.

Building the Spectrum website from scratch, including full UI structure, reusable components, and responsive design.

Practicing Agile development, code reviews, and performance optimization.

WORK EXPERIENCE

Areeba — Full Stack Developer Intern (March 2025 – June 2025)

Built responsive and dynamic web interfaces using React, TypeScript, and Redux.

Implemented RESTful API integrations and optimized state management.

Developed reusable UI components following clean code and best practices.

Collaborated in an Agile team to improve performance and maintainability.

XperBot — Frontend Developer (Remote) (August 2023 – October 2023)

Developed interactive Vue.js interfaces across multiple modules.

Improved UI/UX and implemented component-based architecture.

Strengthened communication and time management in a fully remote workflow.

Contributed to scalable front-end solutions.

Freelance Project — AI Software Development (July 2023 – September 2023)

Worked with a supervisor to develop AI-related software tools using Node.js.

Integrated AI concepts with backend logic and improved debugging skills.

Enhanced understanding of backend development and system architecture.

EDUCATION

Bachelor of Science in Computer Science — Lebanese International University (LIU) (October 2021 – July 2024)

GPA: 3.76

CERTIFICATIONS

SEO Propath Certification — April 2025

XpertBot Academy Vue.js Certification — September 2022

Cisco Networking Academy: Get Connected — December 2021

Full Stack Development Track (Udacity) — March 2021

PROJECTS

Movie Store Inventory App — OutSystems

Implemented role-restricted features (edit/delete) for employees only.

Dynamic KYB Form — React

Template-based dynamic fields, file uploads, and API integration.

Portfolio Website — React, TailwindCSS, Animations

Full personal portfolio showcasing skills, projects, and certifications.

SKILLS

React, TypeScript, JavaScript, Redux, Vue.js, HTML, CSS, TailwindCSS, Material UI, Axios, REST APIs, Formik, Node.js, SEO, Git, Debugging, Responsive Design, Agile Development.

LANGUAGES

English — Fluent

Arabic — Native
